## If Everybody Did It

Think for a moment what would happen if, even for one week, everybody in town were to shop elsewhere—either in a neighboring town or by mail! Would it not cause consternation, and would not all business houses be very much concerned? They certainly would, and with great reason.

## Some Do This Regularly

—And what is the result? Every dollar sent to distant business houses is gone for good as far as that particular district is concerned, and merely serves to build up and maintain some distant town. The local business men are robbed of that circulation of money which during its ramblings might help dozens along the way.

## How About Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

Phone: 37

## HESKETH STORE BURNS TO GROUND

The Hesketh Mercantile Store owned by J. C. Chittick, of Hesketh, was completely destroyed by fire about 12.30 o'clock early Tuesday morning. Mr. Chittick was in Calgary at the time and the cause of the fire is not known, but it started in the front part of the building and before much assistance was available had gained such a start that nothing could be done to save the situation. The building and store contents were a complete loss while some of the furniture in the building was saved. The loss is partly covered by insurance. We understand that it is Mr. Chittick's intention to rebuild the store this fall and again open up for business.

## 7 YEARS AGO

(Taken from the files of the Carbon News of September 30th 1920)

Mr. Fred Harsch has purchased from James Phillips a handsome McLaughlin.

The consecration of the First German Baptist Church took place last Sunday. A big crowd of people witnessed the ceremonies.

Mr. L. Poxon, with a few guests, was at Pine Lake on a duck shooting party.

J. Morrison and Miss Kettleton, W. Cardiff and Miss Campbell, S. Torrance and Miss Ethel Hay, H. Douglas and several others went to a dance at Redland last Monday night. We understand that Cardiff and Douglas were very stiff and sore the next morning, having to push their car a long distance on their homeward journey.

A dollar stays away in direct proportion to the distance sent away; that sent far stays long; that kept here abides in the community, faring forth to the butcher, the baker, the gas distributor, the garage man etc. and so on it again finds its way back to the laborer, artisan, professional man or whoever it was that first spent it in the community.

## MODERN GOLF

A southern Ontario golf club has made a rule prohibiting swearing on the links.

He sliced his drive,  
"Oh! Sakes alive!"  
Into the river,  
"Well, did you ever!"  
And pulled another,  
"What a bother!"  
Into the rough,  
"Now ain't that tough!"  
He dug the grass,  
"Alack! Alas!"  
Then struck a trap,  
"I AM a sap."  
O'er shot the green,  
"Well, that IS mean."  
And missed his putt,  
"Dear me! Tut! Tut!"

—Sudbery Star

When we buy at home our town has both the money and the merchandise. When we send away, our town has only the merchandise.

Did you ever think that there would be no home industries if the people purchased all supplies from outside?

## ERITSLAND-McGRATH

A very pretty wedding was solemnized on Sept. 20, at the home of the bride's grandmother, Mrs. A.M. Tricker, north west of town, when Miss Mildred McGrath became the bride of Mr. Oscar Eritsland. Rev. C. B. Oakley of the Carbon United Church performed the ceremony in the presence of a large number of relatives and friends of the contracting parties. The bride entered the living room on the arm of her father, to the strains of a wedding march, carrying a bouquet of sweet peas and infants breath and looked charming in a gown of white satin with bridal veil and wreath of orange blossoms. The brides maid was Miss Lillian McGrath, sister of the bride, while the groom was supported by Mr. Earl Tricker. The dining table was centered with a three story wedding cake and on excellent dinner was partaken by all those present. The happy couple will make their home in Trochu.

## LITTLE ITEMS OF LOCAL INTEREST

Mr. and Mrs. A. F. McKibbin and young daughter left on Monday for Champion, where Mrs. McKibbin will spend the next couple of weeks. Mr. McKibbin returned on Tuesday.

Clarence Hay arrived on Wednesday and is again employed in the C.P.R. depot here. Mr. H. Korsmo has been transferred to Arrowood.

Mel Roberts, of the Bank of Montreal staff, commenced his holidays last Friday and is spending the time working with S. J. Garrett's threshing gang.

Mr. and Mrs. H. Thorburn and family of Strathmore, were visitors in here over the week end.

R. C. Barr and G. Harmston motored to Calgary last Thursday.

D. Stacy arrived in town last Wednesday night.

G.W. Malton has purchased a new McLaughlin-Buick sedan.

Mr. and Mrs. Burnett of Lansing Michigan, are visiting with their daughter, Mrs. W. Leitch.

I. Guttman spent Monday, Tuesday and Wednesday of this week in Calgary.

J. A. Connolly and Alex Reid went into Calgary last Sunday and returned Monday in Mr. Connolly's new Moon car.

Mrs. Annear, who was visiting in town with her sister, Mrs. L. Poxon, returned to her home in Edmonton.

Lindsay Elliott was a business visitor in town this week.

J. A. Toombs and Dr. H. G. Dunbar were visitors to Drumheller on Monday.

Mr. and Mrs. Armitage arrived in town on Friday night and have been spending the past week here. Mr. Armitage is a noted sign painter and has done quite a bit of work around town. Incidentally he has painted a sign on our front window. Business men take notice!

## FRED SMITH DIES AT STOPP MINE

Fred Smith, miner, who has been employed in the various mines of Carbon for the past six or seven years, and who was lately employed at the Stopp mine, dropped dead about 5 o'clock on Monday evening. Smith had just come off shift and was making his way homeward, when, about fifteen feet from the mine office, he suddenly dropped dead. Dr. McFarlane was called immediately and on examination of the patient he pronounced death due to heart failure.

The late Fred Smith was 48 years of age and was a Welchman by birth, but as far as anyone knows he has no relatives that can be located.

Funeral services were held from the United Church, Carbon, on Wednesday at 5 p.m., Rev. C. B. Oakley conducting the service.

Interment was made in the Carbon cemetery.

## THE NEW FORD CAR

What will Ford's new car be like? is the question the motoring public has been asking for the past number of weeks.

That question is now answered. In the Automotive Daily News, of New York, there appeared on outline of the mechanical features of the new model Ford.

The new car has a four cylinder motor, selective gear transmission, four wheel brakes, and numerous other mechanical improvements and refinements. It is larger, more powerful, and speedier than the old model T, in fact it does not bear any resemblance to the old car.

## Leather - Coats -

Made of solid horse hide. Cost less in the long run. We are showing the largest range the town has ever had—Eight different models. All sizes and priced very much below present value. Coats at from \$9.00 to \$17.50

## Wild Life Of Western Canada

Not least among the attractions that Western Canada has for many people, whether permanent resident, tourist or sportsman, is the abundance and variety of its wild life, and now that the hunting season is at hand it is opportune to make something more than a passing reference to the value of this great asset to all of our Western Provinces.

Judged from any and all standpoints the wild duck and geese, prairie chicken, partridge, and other game birds are of immense value to this country. They constitute a picturesque feature of life on the prairies and are a constant source of delight to the lover of nature. What greater pleasure can be had than to witness the flight of duck in the early dawn or as the sun sinks to rest? A man must be of a very stolid nature indeed who does not get a thrill as he watches them winging their way across the sky.

To the hunter our game birds offer the best of opportunities for the display of the keenest marksmanship, coupled with the best sportsmanlike qualities. And, finally, they provide a welcome addition to our food supply, a delicacy appreciated by all.

Later in the season comes the opportunity for the big game hunter to match his craft and skill with the deer and moose. In a word, the wild life of the West is a drawing card for thousands of people. Without these game birds and animals the West would not be the West which attracts and holds.

But human nature being what it is, it became necessary for Governments by legal enactments to protect these friends of man from man himself. As a result, the open season for shooting has had to be curtailed, and the size of "bags" greatly restricted in order to save birds and animals from extermination. And it is only through the strict observance of these laws, and a rigid compliance with all regulations, that a further curtailment of privileges now enjoyed can be avoided. Laws have been passed and regulations are enforced by Governments, not for the purpose of depriving hunters and citizens generally of the privilege of shooting, but in their own interests that it may be preserved and continued to them.

There are still some individuals in this world, who wrongly style themselves "sportsmen," who consider it sport and something to be proud of and boast about to shoot an inordinately large number of birds in a day or a season. These individuals revel in having their photographs taken, gun in hand, and with their "kill" displayed around them. The real sportsman, and the true citizen, looks upon all such exhibitions with regret and a boathing contempt. It is one thing to shoot for food, or for an hour or two of the real thrill that comes to the true hunter, but quite another to engage in a worse than useless orgy of wanton slaughter. The man who will kill and kill for the mere joy of killing and in order that he may boast of his "bag" is no sportsman; on the contrary, he is the enemy of all sportsmen, and, in the final analysis, his own enemy. In the language of the old fable, he is destroying the goose that lays the golden eggs.

The writer of this article has no desire to preach; he is not a killjoy. But he would, even on the sordid grounds of self-interest, not to mention more lofty motives, urge all the people of Western Canada to constitute themselves unofficial game guardians,—to fully and loyally observe the spirit and letter of the game laws themselves, and see to it that other people do likewise.

A Professor of Psychology claims that brown eyes are an indication of a weak will. He might also add that black ones are an indication of a weak defense. Judge.

According to British research experts, London's smoke cloud excludes nearly two-thirds of the beneficial ultra-violet rays of sunlight from that city.

Did numbers have been converted into raised numbers to enable blind persons to tune in different stations on the radio receiver.

Statistics prove that while, on an average, women are now marrying at an earlier age than formerly, the age of the bridegrooms is proportionately older.

She: "I've been married three times—and each time my husbands have been Williams."

He: "I'll say you're a clever Bill collector."

Another experiment to hasten trans-Atlantic mails is being made. Planes will overtake and drop mail on liners far out to sea.

## North Best For Whites

Tropics Only Suitable For Colored Race Says Scientist

The white races must eventually turn toward the polar regions in search of new homes, Dr. R. N. R. Brown, president of the Geographical section, told the British Association for the Advancement of Science at a meeting in Leeds, England.

"There is no real evidence that the whites are suited for permanent residence in the tropics," Dr. Brown declared. "All evidence that is conclusive suggests that the colored races will eventually occupy the warm lands."

"Eventually the tide of white settlement will definitely set northward, even to the Arctic seas, and in its flood destroy the present inhabitants."

## Removes Touchy Corns Brings Solid Comfort

Acts like magic—takes out all the pain—makes aching corns feel comfy in a few seconds. That's how Putnam's Corn Extractor acts. You will not be disappointed with "Putnam's"—it never fails to lift out corns or remove painful callouses. Get "Putnam's Extractor" from your druggist. Refuse a substitute.

## 71-Year-Old Triplets

Abraham, Isaac and Jacob Waggoner, seventy-one year old triplets, claim the distinction of being the oldest triplets in Tennessee and possibly in the United States. They have lived all their lives within ten miles of one another, have never been ill enough to require a doctor's services and do not smoke, chew or drink.

## MADE HER BABY PLUMP AND WELL

Nothing makes a mother more grateful than a benefit conferred upon her child. Mothers everywhere who have used Baby's Own Tablets for their children speak in enthusiastic terms of them. For instance, Mrs. Zephernin Layole, Three Rivers, Que., writes: "Baby's Own Tablets are a wonderful medicine for little ones. They never fail to regulate the baby's stomach and bowels, and make him plump and well. I always keep a box of the Tablets in the house and would advise all mothers to do likewise." Most of the ordinary ailments of childhood, arise in the stomach and bowels, and can be quickly banished by Baby's Own Tablets. These Tablets relieve constipation and indigestion, break up colds and simple fevers, expel worms, allay teething pains, and promote healthful sleep. They are guaranteed to be free from injurious drugs and are safe even for the youngest and most delicate child. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

In Abyssinia, a telephone message must first be written and handed to the operator, who in turn, shouts it into the transmitter, no one else being permitted to use the instrument.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

## French Scientist Poorly Paid

Edouard Branly Has Worked Fifty Years Under Trying Conditions

Edouard Branly is cited by newspapers as typifying the struggle of French scientists to work under miserable conditions. Branly is inventor of the condenser. France calls him the "father of the wireless."

Branly has as his only assistant in a ramshackle "laboratory" an aged woman who ekes out a living by doing extra hours of housework in other homes. This maid of all work is now the scientist's "laboratory chief." She was intelligent and the professor trained her in his work.

For fifty years Branly has worked under these conditions, drawing a salary of about \$75 a month as professor and supporting his family by occasional practice as a physician. These facts are told by French papers as illustrating the need to pay well men who give their lives to science.

Minard's Liniment eases sore feet.

W. N. U. 1698

## Operates Restaurant 'Plane

Added To Paris-London Service By French Aviation Company

A "restaurant 'plane" has been placed in daily operation on the air line between Paris and London by a French aviation company, the Air-Union, according to advices to the Department of Commerce from W. H. Kelley, automotive trade commissioner to Europe.

A cold luncheon is served, including hors d'oeuvres, lobster, duck, veal, ham, salad, cheese, fruits and coffee, with wine, water or tea. In the near future an electric stove will be installed for preparing warm food.

The 'plane carries a pilot, a radio operator, cook, waiter and ten passengers and their baggage. It is one of the fastest in Europe, covering 335 miles in two hours.

## Another Evolution Theory

British Zoologist Thinks Man Developed From Jelly Fish

If you are musical, like dancing, or have poetical instincts, you may thank your jelly fish progenitors of aeons ago. In the opinion of Dr. C. P. Bidder, British Zoologist, Dr. Bidder outlined his theory that man developed from the lowly jelly fish in an address at Leeds, England, before the British Association for the Advancement of Science, and added:

Our appreciation of dancing, poetry and jazz music is due to the metabolic rhythm inherited from our flagellate forefathers, and shows that we are still flagellates at heart."

## The Good Natured Scotch

The Scotch are all right. But the Scotchman is thick-skinned and he can take a joke, and therefore the jokes about him grow apace. Jokes about the Jews and the Irish have virtually been ruled out of our theatres because of organized protest. Not so with jokes about the Scotch. The Scotchman chuckles at the stories about his penuriousness. He laughs at those excellent golf stories which usually permit him only one ball in his bag. And, after all, it is better to laugh with the people who laugh at you.

## Supports Bay Route

Entire support for the opening of the Hudson Bay route is given by the St. John Telegraph-Journal, one of the most influential newspapers of the Maritime provinces. "In fairness to the west," it says, "attempts to discredit the Bay route should cease. The plan is going through. It should be expedited. Let us hope that the results will fully meet the expectations of Manitoba and Saskatchewan. They have made a resolute fight for what they believed to be their due, and the rest of the country should wish them all good luck."

Used by physicians—Minard's Liniment.

## Flour Exports

During the first six months of 1927, 16,519,328 barrels of flour were manufactured in Canada, a little more than half of which was exported from the country. In the twelve months ended June 30th, Canada exported \$65,191,452. Exports to the United Kingdom increased from 3,219,212 barrels worth \$21,693,802 in 1926 to 3,552,755 barrels worth \$24,085,189 in 1927.

## Aviation Enters New Era

The recent inauguration of a country wide system of air express marks the passage of aviation from its present era of stunt stuff with its inevitable high cost in human life, to the comparatively safe and sound basis of every day commercial use, in the opinion of R. E. M. Cowie, president of the American Railway Express Company.

**Like a Grip at the Throat.** For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passages as thousands can testify. It is sold by dealers everywhere.

A robin built a nest on a mop on the back porch of the home of a Chicago woman. She secured another mop and left the robin undisturbed until a family of six were reared.

**The Oil Of The People.**—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

A French watchmaker has invented a watch that tells time without hands. A moving dial turns inside a stationary rim. The minutes appear on the rim and the hour is shown through an opening in the dial.

Minard's Liniment relieves backache.

Driving became dangerous in the old days when the horse felt his oats; now it's when the driver feels his rye.

The speediest bacteria can travel only about four inches in 15 minutes.

## CHILDREN CRY FOR

**Fletcher's CASTORIA**  
MOTHER:—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Wm. A. Fletcher*. Absolutely Harmless—No Opiates. Physicians everywhere recommend it.

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago  
Pain Neuralgia Toothache Rheumatism

**DOES NOT AFFECT THE HEART**

**Safe** Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.  
Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Mononucleo-acid of Salicylic Acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Editor and Publisher

**Building the New Rink**

Carbon will have bonspiels and skating carnivals this winter. The building of a curling and skating rink will commence immediately and there will be no reason for anyone not having a thing to do during the long winter evenings. Curling is a popular past time in this country and a sport where the older folk may enjoy the benefit of real outdoor exercise and at the same time get the pleasure out of life that would otherwise be lacking.

As far as a skating rink is concerned, a town should not be without one. That is one thing that helps to keep the people sociable and when they all get together, everyone has a good time. The skating rink should appeal to the children and those older people who do not want to curl. A child needs the outdoor exercise as much or more than an older person and skating is one of the best sports where every part of the body is exercised.

Volunteer labor will be necessary for the erection of the rink and all those people with children, or who wish to curl and skate themselves, should find time to come out and help with the work. In this way there will not be very much for anyone to do and everyone will be benefited thereby.

We have been patiently waiting for that subscription donation from Standard, but, as yet, it has not arrived.

**Apple Sauce**

First Driver: I met my wife in a peculiar way—ran over her with my car and later married her.

Second driver: If everybody had to do that, there wouldn't be so much reckless driving.

It took a garter more than nineteen centuries to win a place in the sun.

My, your little brother is grow-

An official announcement has been made to the effect that the Canadian Pacific Railway Company will construct a line from Midland to Port McNicoll. Public parades and demonstrations were held in Midland when the announcement was made as the citizens feel that the new line will mean a great deal in building up manufacturing and industrial concerns there.

Irene Castle, formerly well-known dancer, and wife of the owner of the Chicago Black Hawks hockey team, has recently been staying at the Canadian Pacific Railway hotel, the Algonquin, with her little daughter. They attended the Charlotte County Cottage Crafts exhibition pageant which is held at St. Andrews every year. Rustic dancing and folksong featured at the pageant.

ing!

Yes ma'am; he comes to the hem on mama's skirt now.

The latest ballad is called: "Don't Worry About the Wood, Mother: Father will Bring Home a Load."

Our idea of a fellow out of luck, is when an unlicensed driver with a quart of gin and one arm around a girl, drives a stolen car with no lights and no number plates on a one way street and after running past a red signal and two cops, crashes into a patrol wagon.

"A nickel for your thoughts, Pete," said Jean.

"Well," said Pete with sudden boldness, "I was thinkin' I'd like to kiss you, lassie."

Jean blushed, but made no objection and after the the kiss they lapsed into silence. Presently Jean said: "And what are ye thinkin' about, noo. Another kiss?"

"Nae, lassie, it's mair serious this time. I was just wonderin' when ye're goin' to pay me that nickel for me thoughts."

Phyllis: I'll give Reginald credit for getting me a nice engagement ring.

Dora: I understand that's what the jeweler did.

District Passenger Agent, Calgary

To serve the interests of hundreds of farmers in Southern Saskatchewan two new branch lines of the Canadian Pacific Railway started operation on September 1st, according to announcement by D. C. Coleman, Vice-President, C.P.R. The longer of the two lines run from Assiniboine south to Coronach, a distance of 59 miles, and the second, a 27-mile stretch, runs from Bromhead to Lake Alma.

The 100 members of the British Newspapers' Society left Canada thoroughly impressed with the opportunities Canada possesses. Their impressions are that Canada was already great and is potentially much greater, and they were amazed that so much could have been accomplished in Canada in such a short time by so few people. They sailed from Montreal on the Canadian Pacific Steamship "Montclare," the ship having a large passenger list.

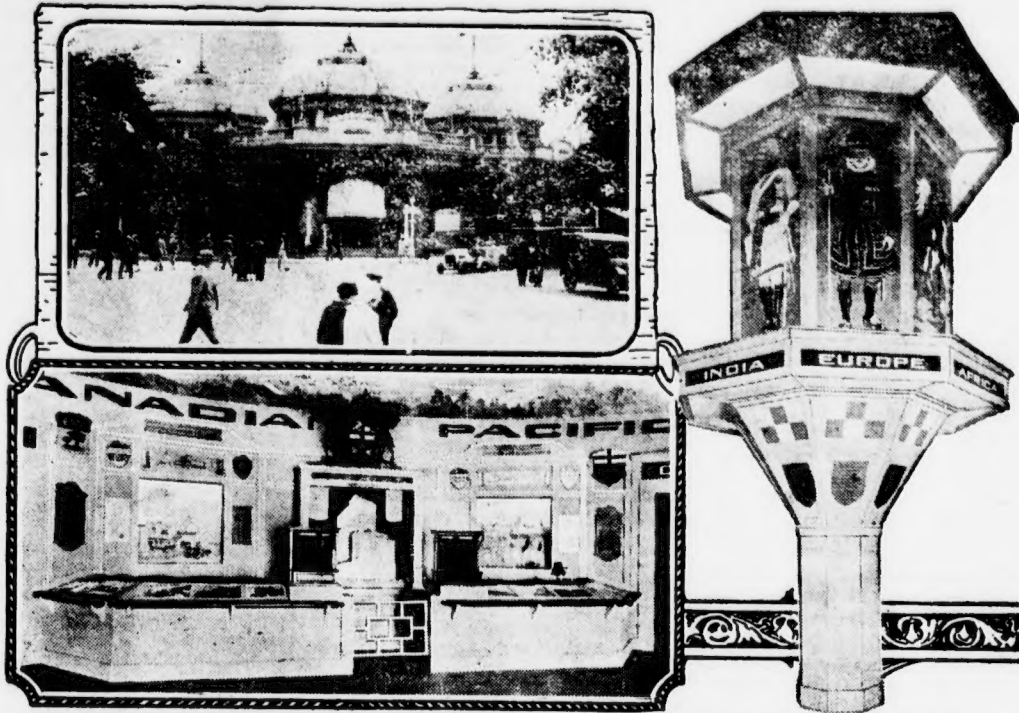

After a strenuous six weeks travelling across the Dominion of Canada, Their Royal Highnesses, the Prince of Wales and his brother George, embarked on the Canadian Pacific Flagship, the "Empress of Scotland," tired but happy. Prince Edward says, "Every time I come to your country I am more and more attracted by the wonderful natural scenery and the warmth of the welcome extended by Canadians, and trust that it will not be long before we meet again."

Approximately 1,000 members of the American Legion visited Montreal on their way to Paris, France, where they will hold their 9th annual convention. The people came from Idaho, Buffalo, Wisconsin, Washington, Montana and North and South Dakota. Frank X. Schwab, mayor of Buffalo, gave the Legionnaires of that city a wild buffalo to be presented to the citizens of Paris. They crossed to Antwerp on the "Montclair" and "Montroyal," both liners in the Canadian Pacific service.

## DONE NEATLY AND QUICKLY AT

### The Chronicle Office

**Handsome Canadian Pacific Exhibits**

(1) The Railway Building at the Toronto Exhibition. (2) A portion of the Canadian Pacific Exhibit. (3) Illustrated data indicating the growth of the C. P. R.

Throwing the spotlight on all its renowned activities, the Canadian Pacific Railway has again achieved success in its exhibit this year at the annual exhibition at Toronto. It is a busy spot for the visitor; for both the artist and the seeker after instruction and education finds in this display a wealth of beauty and learning. Running from the ceiling down to a depth of about four feet was a circular panorama of the Dominion stretching from the Atlantic to the Pacific Coast. This frieze was designed by James Crockett of Montreal and executed by four other Canadian artists. In lovely colorings it gave an actual picture of the country through which the journey is made. At the base of this panorama the famous all-steel miniature Trans-Canada made its run.

Spread out as on a stage was a large model of the St. Lawrence River with the Atlantic Empress steamships and smaller vessels entering and leaving the docks. In the foreground were prosperous looking farms, and across the river the city of Quebec with its winding streets and the towering Chateau Frontenac formed an absorbing picture.

To link the East with the West

there was produced a working model showing the Banff Springs Hotel in its fairy-like surroundings. Here were seen the Canadian Rockies and the Bow River Valley in holiday mood. This beautiful castle of comfort in the heart of the mountains promotes the urge to see more of the country we live in. Tiny automobiles tour the winding paths, trail riders start off with their pack horses for snow-capped peaks, and the Stony Indian with his squaw seated outside their teepee helped to make the setting realistic.

The Company's latest achievement in hotel construction was displayed in a model of the Hotel Saskatchewan, Regina. Covered wagons in the foreground tell the story of man's advancement since the days when wagons were the only means of crossing the prairies.

Special prominence was given to the new Canadian Pacific Hotel to be erected at Toronto, "The Royal York," which when completed will be the largest hotel building in the British Empire. Much interest is being displayed by the public in this new structure which will rise 28 stories above the street level and will be located directly across from

the new Union station. Other exhibits showed models of the Algonquin, Place Viger and Vancouver Hotels.

The Lands of Enchantment and Mystery discovered on the World Cruises were grouped in one colorful setting, with the hint of a cruiser gliding through the waters. All these scenes were reproduced so as to give an illusioning perspective, and lighted with such changing effects as the dawn of day, the sunny noon, the deepening dusk and darkness.

Indicating the immense growth of the Canadian Pacific Express was a dais on which was constructed a reproduction of the Company's present headquarters compared with a model of the original Express building in Winnipeg dated 1882.

In addition there was a wonderful collection of revolving transparencies in natural colors, also rows of these were placed waist high around the exhibit. Each transparency clearly told its individual story. In the centre of the building was a pillar around which are life-sized figures of natives of foreign countries in characteristic costumes.

## STRONGER URGE FOR REDUCTION IN ARMAMENTS

Geneva. — That competitive armaments create an atmosphere of war and that reduction of armaments must be doggedly fought for and achieved was the outstanding feature of the addresses at the League of Nations assembly.

The Japanese delegate Mineichiyo Adachi said Japan ardently desired that ruinous competition in armaments should be brought to a standstill and lowered to a level strictly essential to national security. He pledged his country's co-operation with the League's preparatory disarmament commission, which another speaker, Erich Lofgren, Foreign Minister of Sweden, insisted was useless to convene anew before the great military powers settled the divergences of views which had appeared at previous meetings of the commission.

M. Lofgren criticized the council of the League for its passive attitude on political problems in the past year, alluding, it is believed, to the controversy between Italy and Jugoslavia, and showed no terror of the great powers when he scoured the practice of certain members of the League in discussing burning political questions among themselves.

After declaring the old pre-war methods were still in vogue, Felix Cielens, Foreign Minister of Latvia, warned the assembly that the military budgets of 1926, including naval and air forces, amounted in Europe to one billion and a half dollars, about the same as in 1913, and that the aggregate number of soldiers, more than three million, was only slightly less than the figure for 1915.

Moreover, he remarked, the technical equipment of armies was far more developed than before the great war.

"We are living under the conditions of armed peace which prevailed before the war," he declared, "and under a system of competitive armaments which many of us believe will sooner or later land the world into war."

## Fire Prevention Week Begins October Ninth

•Proclamation Contained in Extra Edition Of Canada Gazette

Ottawa.—An extra edition of the Canada Gazette contains a proclamation appointing the week commencing October 9 "fire prevention week" and calling upon citizens of the Dominion to inspect their premises. Fire drills are called for in schools and institutions. Boy Scout leaders are asked to give special instruction, teachers and municipal officials are asked to give training in fire prevention in the school and publicity is asked for legislation and regulations pertaining to the question.

The preamble to the proclamation states that the average annual loss of insurable property exceeds \$10,000,000 and that 300 persons annually lose their lives as a result of fires.

## Pioneer Of West Dead

Captain Bruce Griggs Brought Early Settlers Into Dominion

Winnipeg.—Capt. Bruce Griggs, one of the most picturesque figures of the Red River settlement frontier days, is dead in Seattle, Wash.

Capt. Bruce was one of the pioneers connected with the steamship transportation system between the Northwestern States and Canada, bringing many settlers into the Dominion previous to the completion of the first transcontinental railway line. He was 73 years of age.

## Starts Aerial Mail Service

Montreal.—Canada's first attempt to start an aerial mail service was made September 7, when Major Tudhope, of the Canadian Aerial Service, hopped off from the Canadian Vickers' yards at Maisonneuve aboard a Vannes biplane for Father Point, where he made arrangements to take mails off the Empress of France when the liner was in the St. Lawrence waterway.

W. N. U. 1698

## French Grateful For British Sympathy

Have Presented "Golden Book" To Chamberlain In Appreciation

Paris.—For months French artisans and statesmen have been busy preparing a "golden book" which has been given by Foreign Minister Briand and other Government officials to Sir Austen Chamberlain and Clemenceau, respectively.

The Minister of Foreign Affairs explains the motive of the gift—gratitude of France for British sympathy and aid. The Premier stresses the importance to world peace of Anglo-French co-operation and at the same time expresses French admiration, sympathy and affection for Britain. M. Clemenceau, the wartime Premier, writes: "True love consists not in the telling but in the proving."

The book contains views of the most interesting sites in France and the Colonies and is autographed by outstanding French statesmen, soldiers and diplomats.

## Demands Repeal Of Trades Union Act

Alternative Set By Congress Is Resignation Of Baldwin Government

Edmonton.—The Trades Union Congress in session here, replying to Premier Baldwin's appeal for industrial peace, carried by general acclamation a discussion demanding the immediate repeal of the Trade Unions Act (restricting certain trade union activities) and failing this, urging that a general election be called immediately.

The resolution emphasized that workers were desirous for industrial peace. It said, however, that peace was hindered by the government's industrial legislative policy; its attacks on the workers' wages; its action in lengthening the miners' hours of work and the "deliberate class bias displayed in trade disputes and in the Trades Unions Act."

## Might Be Message From Distressed Plane

Carrier Pigeon Found Near Mission City Bearing SOS Message

Mission City, B.C.—Bearing the letters SOS and the figures 40022 on a metal band upon its leg, a carrier pigeon, which, it is thought, may have been freed from a distressed plane or ship, is at the ranch of I. Erickson, farmer, living at Silver Hill, seven miles from here.

The bird, and another carrier pigeon, alighted at the ranch in an exhausted condition and very thin as though they had flown a considerable distance. One of the pigeons flew away again.

## Abandon Search For Fliers

Hope Of Finding Trace Of Missing Dole Aviators Has Vanished

San Diego, Cal.—The last hope that searching American war craft would find some trace of the seven missing Hawaiian fliers apparently vanished as the scout cruiser, Omaha, flagship of Rear Admiral Luke McNamee, and six destroyers rested here on their arrival from Honolulu after searching an area of approximately 450,000 square miles in extent.

Admiral McNamee reported that not a single trace of the missing Dole fliers was discovered.

## Leave For Hudson Bay

Montreal.—Following upon the departure of the Canadian government merchant marine steamer, Canadian Raider, for Hudson Bay, via Sydney, N.S., where a cargo of coal will be loaded, the department of railways and canals has despatched the seagoing tug, Ocean Eagle, to Hudson Bay. The tug was formerly the St. Arvens of the Saint John Drydock Company. It is not known how long the Ocean Eagle will remain at Fort Churchill.

## Would Extend Organization

Guelph, Ont.—Discussion of a concerted effort just now getting under way to incorporate all employees of the different branches of the postal service clerks, railway mail carriers, porters, letter-carriers and all others—into one body featured the third annual convention of the Dominion Postal Clerks of Ontario, held here.

## Wins Prize For Coinage Design

J. E. H. MacDonald, Toronto, Ontario artist, who won the \$1,000 prize in the Dominion-wide competition for the best designs for Canada's new nickels and quarters. The new coinage will mark the Diamond Jubilee of Confederation.

## More Grain Through Vancouver Port

Reduction In Rate From Calgary Will Increase Shipments

Vancouver.—The recent order of the Dominion Railway Board reducing to 20 cents the rate on export grain from Calgary to the Pacific coast means that the movement of grain through Vancouver this year will jump to 75,000,000 bushels, said G. G. McGeer, addressing the Vancouver South Federal Liberal Executive.

"The order is a guarantee of that, if it is carried out," said the freight rates expert of the Provincial Government. "And," he added, "that means Vancouver will become one of the greatest grain ports in the world, third or fourth."

British Columbia still had a complaint, however, he asserted, pointing out that the rate on the 968 miles haul to Quebec City had been placed at 18 cents, while that for the 642 miles haul to Vancouver was 20 cents.

"We don't care what the rate to Quebec is," Mr. McGeer exclaimed. "We don't care how low it has to be to help Quebec to get the business away from New York. But Vancouver wants the same treatment. Vancouver is just as much in competition with New York as is Quebec."

## Canadian Heads Committee

Geneva.—Hon. Raoul Dandurand, Canadian Senator, has been appointed chairman of one of six committees appointed by the Assembly of the League of Nations, Senator Dandurand is chairman of the committee which deals with the following subjects: Alcoholism, economic conference and the work of the various organizations of the League of Nations.

## Lowest Birth and Death Rate

London.—The lowest birth rate ever reported in England and Wales, except in war time, is shown by the report of Sir George Newman, chief medical officer of the ministry of health, for 1926. There was 694,000 births and 453,000 deaths. The latter also was the lowest ever recorded. The 1925 report shows 719,582 births and 473,000 deaths.

## Return From Visit To England

Hon. J. E. Brownlee, premier of Alberta, and Mrs. Brownlee, recently returned from England, in this photograph, taken on the White Star liner Regina, on which they returned, Mr. and Mrs. Brownlee are shown on the

## Stripped Of Aviation Honors

French Flier Charged With Falsifying Report Of Altitude Record

Paris.—Jean Collizo, who gained fame as an altitude flier, stands disgraced and stripped of his honors.

The sports committee of the French Aero Club after a hearing on the charges that he falsified the barograph records of his latest record breaking attempt, decided that they were fully proved.

It inflicted the severest penalty within its power—disqualification for life—and struck from its list the previous records with which he was credited.

The French altitude record, by virtue of the club's action, now goes to Sadi Lecoq and the world's record to former Lieutenant J. A. Macready, of the United States army air force.

The charges against Collizo, as published in the French press, were that he inserted on his barograph a sheet on which a curve had already been plotted in invisible ink, to indicate a record-breaking flight of 13,000 metres, or 38,704 feet. It was alleged that after taking off for the purported attempt he shot steam against the paper, thus making the ink legible and subsequently submitted the sheet as proof of his record breaking claim.

## Germany Affected By Polish Tariff

Hit Harder Than Other Countries By New Ruling

Warsaw.—Customs tariffs will be increased by 100 per cent., effective in four months, to all countries not protected by trade treaty with Poland, an official bulletin announces.

The ruling will hit hardest Poland's western neighbor, Germany, with whom negotiations for a commercial accord have been in progress five years without result.

One of the difficulties preventing the conclusion of a Polish-German agreement is Germany's insistence that Poland deport no German citizens now residing on Polish soil.

Several other points, also foreign to trade, are causing delays, through the two Governments are practically agreed as far as commerce itself is concerned.

## Will Of J. Ogden Armour

Left An Estate Valued At One Million Dollars

Chicago.—The will of J. Ogden Armour, who once was worth an estimated \$200,000,000, was filed for probate and disposed of an indicated estate of \$1,000,000.

The will left \$100,000 outright to his daughter, Lolita, now Mrs. John J. Mitchell, Jr., and an annuity of \$12,000 to her husband.

The remainder of the estate, except for a few minor bequests of from \$1,000 to \$5,000 to servants, was left in trust for the benefit of the widow and daughter.

## Predict Early Winter

Leveland, Col.—Two flocks of wild geese have been seen flying South for the winter. The early appearance of the birds, which usually do not migrate until Fall, has led to predictions of an early and severe winter. Sportsmen fear the geese all will be gone before the hunting season opens.

## DOMINION HAS DEVELOPED A MARKED IDENTITY

Vancouver.—There can be no question of the existence of distinguishing characteristics which give to Canada a marked identity of her own among the nations of the world, Sir Robert Falconer, president of the University of Toronto, said here, addressing the Canadian Club on the subject, "Elements of Canadian Nationality."

"All across Canada the pronounced characteristics of the people are more and more apparent," the speaker said. "And there is unity everywhere. No matter where one travels in Canada one feels at home; but when you cross the line into the United States there is not the same feeling."

Sir Robert credited the Maritime provinces with being responsible for the Canada of today. He said if there had been no Maritimes there probably would have been no British Canada. The founding of Halifax in 1749 was one of the most strategic moves ever made by Great Britain. He also gave credit to the United Empire Loyalists for playing an important part in laying truly the foundations of the Dominion.

"Halifax held Nova Scotia and New Brunswick loyal," said Sir Robert. "and the Maritimes always must remain a very important part of Canada."

The speaker told of the extreme difficulties which the early British settlers in Canada faced. However, these conditions bred men of resource and adaptability.

Sir Robert dwelt on the question of the French in Canada, commenting upon the difficulties encountered through two entirely different peoples living side by side. The wonder was that there was not more trouble in the early days. As time passed the two had come to know each other better, an element of tolerance had developed, and there was a better feeling today than ever before.

## Trying To Adjust Immigration Rules

Change Would Simplify Problem Of Canadians Working In Border Cities

Toronto.—The Toronto Mail and Empire publishes the following despatch from Washington:

"A new program of amendments to immigration and naturalization laws is being worked out by experts in the Labor Department in anticipation of action upon that subject in the next congress.

"Secretary of Labor Davis, returning today from an inspection of border operations, outlined his plans to his assistants and announced that immigration in future, if he has his way, will be on a much stricter basis.

"Changes in the law to be proposed include: Revision of quota laws so as to smooth out present difficulties with Canada and permit Canadian aliens to work in American border cities, such as Detroit and Buffalo, without undue hardship.

## John Oliver's Will

Vancouver.—Probate was granted in supreme court by Mr. Justice Morrison of the late Premier John Oliver's will. In a four-page document executed July 15 last and signed "Hon. John Oliver," the testator disposed of a gross estate of \$75,274, which is subject to liabilities of \$249, so that the net valuation is \$75,025. Mr. Oliver died August 17 at Victoria. The widow, five sons and three daughters are the sole beneficiaries.

## Two Killed In Collision

Calgary.—Two trainmen were killed, one passenger injured, and more than a score suffering from slight bruises and shock, when C.P.R. passenger train second No. 1 and second No. 2, the Imperial Limited, met in a head-on collision at Edmond, 15 miles east of Calgary, on the main line.

## Against Communist Party

Halberstadt, Germany.—The Pan-German League, which is holding a convention here, has adopted resolutions, demanding the dissolution of the communist party and the suppression of its organs. The league represents the national extremists.

## Railway Commission Ruling Is Cause Of Worry To American Railway Interests

The Washington Post, under the caption "Canada's Unkind Cut," says: "The Canadian railway commission has apparently put a crimp into the transportation interest of the Great Lakes and the American railroads that join the lakes to the seaboard. Incidentally it would appear that the order fixing freight rates from the great grain fields of the Canadian northwest to Montreal is likely to result in diverting 25,000,000 bushels of export grain from American seaports to the ships that make Montreal, instead of New York, Boston and Baltimore, their western terminal."

"The Canadian commission ordered a reduction of the rate on grain from 34.5 cents per hundred pounds to 18.5 cents from the head of the lakes to Montreal and the Canadian seaboard. This reduction in the established rates of nearly 50 per cent, naturally caused consternation in American shipping circles and some means of retaliating is being sought."

Not only will this reduction materially affect the earnings of the ships and railroads so largely interested in the commerce of the whole lake region, but it may have a decided effect upon the milling interests of Minnesota. It has been the custom for many years for the people of Manitoba to ship their hard wheat to Minnesota and Duluth to be ground into flour for export. This grain is admitted free of duty under bond, and the flour has been transported over railroads or by water through Buffalo to Atlantic ports for export.

"Should the order of the Canadian commission result in diverting Canadian wheat and other grains through the elevators at Montreal instead of Buffalo, the effect on the earnings of the transportation lines on this side of the border will be very damaging. The grain interests will endeavor to induce American railroads to appeal to the Interstate Commerce commission for permission to meet the Canadian cut."

### Marking Highways In Saskatchewan

Men Working From Boundaries To Centre Of Province

Two parties of men, working from the Manitoba and Alberta boundaries toward the centre of the province, have been assigned by the Provincial Department of Highways to the task of blazing 3,000 miles of provincial highways with new signs. The work will be carried on as long as possible this season, and it is hoped that, next summer will see its completion. Each highway will be given a number, which will appear on the signs now being put up, and also in roadmaps. The road signs are designed for visibility, and will consist of a target on a steel standard bearing in addition to the geographical data the abbreviation "Sask." and the Provincial coat of arms. It is understood that Manitoba has undertaken a similar plan, and that Alberta will follow shortly.

### Latest Use For X-Rays

Detects Solid Materials In Rags Used For Making Paper

New uses are always being found for X-rays. One of the latest is that of searching for buttons and other solid materials in piles of rags that are to be used for paper making.

Serious damage to the pulping machine is likely if buttons, hooks, eyes, and such like are not removed from the pulp. To prevent this, endless bands convey the rags over an X-ray tube, where the solid materials are detected by fluorescent screens in the X-ray outfit.

### Noise Making Ears Larger

If you have large ears and they are getting bigger, this may be the cause, Dr. Pfleger, Vienna ear specialist, says the noise and clamor of modern city life are producing a race of elephant-eared men and women and says he can confirm this by measurements of his patients' ears for the last 30 years. If city noises are the cause, why should ears grow larger when what humanity needs is something that will muffle sound?

### Feeding Market Hogs

Feeding Has A Distinct Influence On The Quality Of Finished Market Animal

A large proportion of pigs marketed fall in one or more respects to comply with the standard required by either the pork butcher or the bacon curer, a frequent fault being over-fatness. Often this is due to unsuitable breeds and breeding, but live stock men all admit that feeding, whether it be bad or good has a very distinct influence on the quality of the finished market animal. In fact some feeders go so far as to claim that proper feeding methods are of equal importance to correct breeding. In order that hog raisers may have easily available information on proper methods of feeding the Dominion Animal Husbandman has issued a pamphlet on "Breeding and Feeding the Market Hog," which may be obtained from the Publications Branch, Department of Agriculture, Ottawa. Well-balanced rations, injurious substitutes, deficient rations, over or under feeding, lack of intelligent understanding of nutritional requirements generally, all exert a particularly powerful influence during the early growing period as affecting later development. For instance the demand of the bacon curer is for small well finished, fine-boned carcasses, with a proportion of lean and a low proportion of oil. To obtain these the feeding must be correctly carried out all through the development of the animal. The use of inferior feeding stuffs, or the misuse of suitable foods, will cause otherwise excellent carcasses to turn out practically worthless or to be reduced seriously in value.

### An Attractive New Frock

This charming frock is shown in View A fashioned of lace and satin, and in View B of figured material. The skirt and bodice are gathered to a belt, and there is a soft bow arranged at the top of the front panel. Bands of ribbon form an effective trimming on the bodice and long gathered sleeves, and is also used for the binding on the V neck and top of the vestee. No. 1649 is in sizes 34, 36, 38, 40 and 42 inches bust. View A, size 36, requires 2 1/4 yards 39-inch lace, and 1 1/2 yards 39-inch material. View B, size 36, requires 2 1/4 yards 39-inch, or 3 yards 54-inch material; 5 1/2 yards 2-inch ribbon. Price 20 cents the pattern.

### World's Record In Egg Laying

White Leghorn Belonging To University Of British Columbia Is World Beater

The Superintendent of the Dominion Experimental Farm at Agassiz, B.C., Mr. E. H. Hicks, D.S.A., claims several world's records for egg laying at the farm. In order that these claims may be exactly understood the official report for the year 1926 is here quoted almost verbatim. After saying that previously 215 eggs per bird was regarded as high as could reasonably be looked for, the report continues: "The contest just completed finished up with an average of 231 eggs per bird, that is 106,226 eggs from 460 birds, which is considered to be a world's record. Apart from this several other world's records were made both as to pen production (ten birds to a pen) and from individual birds. The pen that won the contest with a score of 3,057.5 points established a world's record. The pen which scored highest for egg production with a total of 2,946 eggs or an average of 294 eggs per bird made a world's record for number of eggs. The Barred Rock that finished in the lead with a total of 499 points with 326 eggs also made a world's record for points, all breeds. The outstanding record of all, however, goes to a S.C. White Leghorn belonging to the University of British Columbia, namely 351 eggs in 364 days."

Points are awarded on the following basis: one point for each egg averaging 24 ounces to the dozen; one-tenth of a point deducted for each ounce that averages less than 24 to the dozen; bonus of one-tenth of a point for each ounce of eggs that average more than 24 to the dozen. Eggs averaging more than 27 ounces to the dozen are regarded as just averaging that number. Eggs averaging less than 20 ounces to the dozen, exceedingly badly shaped eggs, and soft-shell eggs are not credited.

When a new girl comes to a small town all the boys sit up and take notice.

One doesn't need to be an aviator to know the meaning of air pockets. Just ask the returning vacationist.

## Canada Is Building Up And Developing Trade Into Remote Corners of the Earth

### When Pockets Are Dangerous

Unless Kept Clean Will Collect Germs Says Bacteriologist

Are you one of the many thousands of people who catch cold after cold, or who are hardly ever free from troublesome catarrh, or some similar ailment?

If so, you had better empty your pockets, brush the linings thoroughly, and then have them washed with a good disinfectant.

A bacteriologist has been examining the fluff, dust, dirt, and so on, contained in a man's pockets, and he identified seventeen varieties of germs and estimated the total number at 3,000,000.

In the fine dust was the deadly poison veridigra, rubbed from copper coins by friction; phosphorus from matches; nicotine in powder, and other harmful substances. Of the germs that produce catarrh there were thousands!

Whenever a handkerchief picked up a few of these germs they were inhaled, and if the conditions were favorable to them, the owner of the handkerchief got another attack of catarrh.

That the comparatively heavy veridigra remained in the bottom of the lining was a blessing. Wiped on to the lips the result would have been serious.

When we wonder where we caught this or that ailment we need not in many cases go farther than our own pockets. Pluff—especially if it becomes damp through rain—is a rearing ground for germs.

The moral is obvious—keep your pockets clean.

No really good gramophone is ashamed of its own record.

Some men actually believe that pointers well worth considering.

### Canadian National Running Trophy

As a means of fostering interest in middle distance running in Canada, the Canadian National Railways Recreation League has presented to the Amateur Athletic Union of Canada the above handsome bronze statuette and medals. The trophy is a handsome bronze statuette, on a base of native Canadian wood. It is a perpetual award and will be held for one year by the winner of the one-mile race at the Dominion Championship meet at Toronto. The runners

who are first, second and third will receive gold, silver and bronze medals respectively. The presentation of the trophy and medals was made to the A.A.U. of C. on behalf of Canadian National officers and employees who are members of the Canadian National Recreation League of which Sir Henry W. Thornton is patron and A. J. Hills, president. The League is representative of Canadian National sports activities from Coast to Coast in Canada.

### Meaning Has Changed

Word "Match" Came From Greek For Lamp Wick

Originally, the word came from the Greek for a wick of a lamp or candle, but in the process of centuries it has changed its meaning several times. Thus we had the match of the old match-lock gun, a sort of long wick arrangement along which a spark gradually crept.

Our very earliest pocket matches were really a glorification of wicks, being little flat shavings of wood which were "fired" by the aid of flint and steel and tinder. The next stage was when we began to dip these matches in chemicals, and so got the friction match. The friction match soon put out of the field all the older clumsy and complicated ways of getting a light, and soon we dropped the "friction" from the term and got our modern "match."

### Walnut Becomes Expensive

In an article on Sir William Muir's black walnut plantation, estimated at \$2,000,000 when it matures a Toronto writer says: "One well-grown walnut will yield about 500 feet and at a fair estimate is worth \$100. Many old log barns and rail fences in Ontario are being torn down for the small amount of walnut in them. In time the price will be undoubtedly doubled or trebled."

### Smallest Cafe Closed

The smallest restaurant in the world has closed, a financial failure after years of success. It operated in a room three feet by eight, and accommodated only one customer at a time.
